To Our Valued Customers,

CONMED Corporation is proud to announce an important compatibility update involving the AirSeal[®] product portfolio and da Vinci robotic platforms. The AirSeal[®] Robotic Solution (ARS), comprised of three SKUs developed by CONMED Corporation in collaboration with Intuitive, is now indicated for use with the Intuitive Surgical da Vinci 8mm Hex Cannula used with the da Vinci 5 Robotic Surgical System.

Product Description	Da Vinci Compatibility*	CONMED Product Code	CONMED UOM
AirSeal [®] 8mm Cannula Cap and Obturator with Bladeless Optical Tip, Standard Length	da Vinci X, da Vinci Xi, da Vinci 5 and da Vinci Assist Cannula	iAS8-DV	6/Box
AirSeal [®] 8mm Cannula Cap and Obturator with Bladeless Optical Tip, Long	da Vinci X, da Vinci Xi, da Vinci 5 and da Vinci Assist Cannula	iAS8-dVL	6/Box
AirSeal [®] Bifurcated Filtered Tube Set with Activated Charcoal Filter	da Vinci X, da Vinci Xi, da Vinci 5 and da Vinci Assist Cannula	ASM-EVAC1-BI	6/Box

AirSeal[®] offers a high standard of performance for surgical insufflation. CONMED's AirSeal[®] functions with an open loop system delivering consistent, stable low-pressure pneumoperitoneum, continuous smoke evacuation, and a demonstrated improvement in post-operative outcomes.*

CONMED Corporation and Intuitive recognize a shared mission aligned to the Quintuple Aim of Healthcare. This collaboration is driven by a shared goal of putting the patient first and fostering the best possible surgical outcomes. Allowing compatibility between two innovative platforms, the AirSeal® Robotic Solution and the da Vinci 5 robotic system's hex cannula, is intended to support positive procedural outcomes.

The AirSeal® Robotic Solution enables the full performance of AirSeal® to be incorporated into the Intuitive da Vinci 5 procedure workflow without the need for an assist port. The performance of the AirSeal® Robotic Solution is operationally comparable to the existing AirSeal® access ports and tube sets. It has been engineered to meet the technical performance requirements of the da Vinci 5 platform.

This expanded compatibility brings meaningful advancement to minimally invasive surgery. Hospitals and clinicians can continue to benefit from the procedural efficiencies and enhanced patient outcomes delivered by CONMED Corporation.

For questions regarding product availability, ordering, or clinical support, please contact your CONMED representative. You may also contact CONMED Corporation's customer experience team at 866-426-6633 or customerexperience@conmed.com.

Respectfully,
